

PRESS RELEASE

WareLite and Marathon Technologies announce alliance

COMBINATION OFFERS CONTINUOUS AVAILABILITY FOR MISSION-CRITICAL APPLICATIONS ON INDUSTRY STANDARD WINDOWS-BASED SYSTEMS

Andover, UK, 20 September 2006 - WareLite Ltd, an innovative Event Driven Application Platform (EDAP) vendor, and Marathon Technologies, the fastest growing high availability company with their everRun™ software products for Microsoft® Windows® environments, today announced a new business alliance.

Under the agreement, WareLite's grid-based EDAP, WL BOSS, and Marathon's EverRun™ FT will provide uninterrupted availability for critical high-volume, real-time processes, essential in sectors such as financial services and telecommunications.

"Industries with real-time processes that demand the highest transactional performance and scalability, such as on-line trading and e-betting, tend also to be those where service continuity is most critical," said Elena Pasquali, WareLite CEO. "Marathon's everRun software provides the highest levels of availability and disaster tolerance to all business processes running on WL BOSS – meaning that clients processing thousands of transactions per second do not risk losing a single one."

"Conventional wisdom to date takes the view that extreme performance and high availability can only be achieved through upfront investments in high-cost hardware and complex software infrastructure" said Gary Phillip, Marathon's president and CEO. "Marathon and WareLite defy conventions, providing unparalleled performance and high application availability on industry standard hardware."

About WareLite

WareLite Limited is a UK based independent software vendor. WareLite first product is WL BOSS (Business Operating Support System). WL BOSS is an Event Driven Application Platform - a grid based, unified software platform for the execution of automated, event driven business processes requiring extreme OLTP. WL BOSS allows the introduction of innovative Event Driven Business Solutions within existing systems landscapes - with a zero-impact, evolutionary approach. WL BOSS finds its ideal application in the execution of sensor driven, high performance processes. Sensor technologies used in conjunction with WL BOSS include RFID, Barcode, Indoor Location Tracking, Internet Embedded Devices, GPS, POS etc. For further information please visit www.warelite.net, send a message to info@warelite.net or call +44 (0)20 30 11 2009

About Marathon Technologies

Marathon Technologies Corporation, the fastest growing high availability company, defines what's next after clusters -- Infinite Availability™. Moving beyond traditional high availability, Marathon sets a new standard for application availability using its patented virtualization technology that embraces off-the-shelf servers, Windows and business applications. Marathon's everRun™ product family delivers a completely automatic path to application availability, liberating busy IT professionals from unnecessary complexity. Marathon is a privately held, venture-backed corporation based in Littleton, Massachusetts, USA, with offices worldwide. For more information please visit www.marathontechnologies.com or call +44 (0) 1344 706241.
