

## WareLite Named "Cool Vendor" by Leading Analyst Firm

*Vendors selected for the "Cool Vendor report" are innovative, impactful and intriguing*

Andover, 28 March, 2006 – WareLite has been included in the list of "Cool Vendors" in the "Cool Vendors in Platform Middleware, Event-Driven Application Servers, 2006" report by Massimo Pezzini, Yefim V. Natis, 14 March 2006, Gartner, Inc.

Event-driven application servers (EDAS) provided by the vendors discussed in this research are the vanguards of an emerging trend in platform middleware: support to event-driven architectures. Gartner expects their adoption will grow during the next five years as demand for high-performance software platforms supporting "extreme" requirements for performance, scalability and availability manifests in industry sectors, such as financial services, telecommunications, defense, retail, transportation, e-commerce and online gambling.

WareLite was listed in the Gartner Report. WareLite's EDAS is WareLite BOSS (Business Operating Support System). This is a grid based, unified software platform for the execution of automated, event-driven business processes requiring extreme OLTP capabilities. WareLite BOSS offers horizontally scalable, real time processing power with intrinsic high availability. Running on inexpensive computational units, WareLite BOSS allows the introduction of innovative event-driven business scenarios within existing systems landscapes - with a zero-impact, low cost, evolutionary approach.

"The need for event-driven, 'extreme' processing capabilities is being driven by the growing adoption of sensor technologies that can monitor, in real time, every aspect of the enterprise ecosystem" said Elena Pasquali, WareLite CEO. "WareLite BOSS offers enterprises the possibility of reaping immediate benefits through the adoption of innovative, sensor-driven business solutions that extend the capabilities of current applications, at the same time deploying an Event Driven Architecture that will support all future enterprise event-driven business processes, in harmony with legacy applications"

### About Gartner's Cool Vendors Selection Process

Gartner's listing does not constitute an exhaustive list of vendors in any given technology area, but rather is designed to highlight interesting, new and innovative vendors, products and services. Gartner disclaims all warranties, expressed or implied, with respect to this research, including any warranties of merchantability or fitness of a particular purpose.

Gartner defines a cool vendor as a company that offers technologies or solutions that are: Innovative, enable users to do things they couldn't do before; Impactful, have, or will have, business impact (not just technology for the sake of technology); Intriguing, have caught Gartner's interest or curiosity in approximately the past six months.

### About WareLite

WareLite Limited is a UK based software development and marketing company.

WareLite BOSS (Business Operating Support System) is an Event Driven Application Server - a grid based, unified software platform for the execution of automated, event driven business processes requiring extreme OLTP. WareLite BOSS allows the introduction of innovative Event Driven Business Solutions within existing systems landscapes - with a zero-impact, evolutionary approach.

WareLite BOSS finds its ideal application in the execution of sensor driven, high performance processes. Sensor technologies used in conjunction with WL BOSS include RFID, Barcode, Indoor Location Tracking, Internet Embedded Devices, GPS, POS etc.
