WARELITE IN THE VISIONARIES QUADRANT FOR 2Q08 ENTERPRISE APPLICATION SERVERS MAGIC QUADRANT

Andover, UK, 6 June 2008 - WareLite has been positioned by Gartner, Inc. in the Visionaries quadrant in the 'Magic Quadrant for Enterprise Application Servers, 2Q08' report, written by Analysts Yefim V. Natis, Massimo Pezzini, Kimihiko Iijima and Raffaella Favata and published on April 24, 2008¹.

Designed to tackle demanding event driven business applications, WareLite BOSS (Business Operating Support System) offers a powerful and sophisticated grid-based Event Driven Application Platform for extreme transaction processing (XTP). According to the Gartner report, 'Service-oriented architecture, extreme transaction processing, software as a service, open source and event-driven architecture are the key drivers of change.'

Vertical event driven applications supporting XTP, like WareLite DCM (Real Time Demand Chain Management), will drive competitiveness in those sectors where reacting in real time and at the lowest cost to 'extreme' volumes of business events is fast becoming an imperative - such as retail, CPG, Travel & Transport, Financial Services, Telco.

If you would like more information about WL BOSS or the vertical applications 'powered by WL BOSS' that WareLite and our partners have developed, please contact us at info@warelite.com.
